

Let me first introduce myself especially for the people of Div A. Hey Everyone, I am Bhavika Tambi, 3rd year undergraduate student from ECE B division. I am born and brought up in the pink city Jaipur, Rajasthan.

I am a self-taught Full stack Web developer and hence my interest lies in WebDev.

I am a cool-hearted person, so I usually see every difficulty with positivity and keep myself always smiling which makes me stronger day by day. Because I believe in saying "Sometimes to win you must be prepared to loseand the one who ends up winning the end game is a maverick."

My goal is to land in a well-reputed MNC where the company gains good results for which I can be proud of and I'm in a good position to improve my skills, i.e. both processes should go in parallel.

Now coming to the main point, Along with some of our other batch mates I am too standing for the post of TNP coordinator! So now the question is why you should select me!!

What I will do after becoming a TNP coordinator!

- 1) I will make sure that all previously visited companies should again come to our college and call upon new companies to increase our college network by contacting Alumni and through platforms like LinkedIn and will act like a bridge between you, companies and our esteemed TNP cell.
- 2) What I felt like many off-campus good opportunities go off and many students miss the same. I will try my best to cover that too as I am too active on LinkedIn and other social platforms.
- 3) I along with other fellow coordinators will try to organize a personal training session for the people who are facing problems and will try to connect them with already placed people in their fields.
- 4) I along with other coordinators will try to provide you people with handouts that contain some common HR and Technical questions beforehand so that you don't run between Google and YouTube to find out the same just before interviews.
- 5) Have you felt you missed some important mails and regretting that!! No more worries now.. we are presently working on a portal that is exclusively for mails and TNP purposes making it easier for you.
- 6) We together will make sure that upcoming 3rd year Batch should be well acquainted with the common hiring procedure of companies beforehand so that they do not feel any difficulties.
- 7) Last but not the least I am open for everyone at any time to assist you people so do reach me out without any hesitation. For those who never had interaction with me, you can contact people from batch A5 who know me very well as a team-oriented member.

Being the extended technical secretary for year 2018-2019 and cultural head for year 2019 - 2020 of only girls hostel of SVNIT, I do have an experience how to deal with the people professionally. If given a chance, I assure you people that I will give my best in improving our placements. So do vote wisely as it will be going to affect the whole placement of our batch.
